Billing Document Creation: After PGI, a billing document is generated in SAP, which records the financial transaction. 5. Invoice Posting: The billing document is posted to Financial Accounting, creating an invoice for the customer. 6. Payment Processing: The customer pays the invoice, completing the cycle. The billing process ensures accurate revenue recognition, proper accounting, and efficient financial reporting. 5. What are the different types of billing documents in SAP SD? Organization becomes easier with digital libraries. Files can be categorized, backed up, and synced

across devices. Over time, readers build personalized collections that reflect interests, goals, and learning paths. Important information remains easy to retrieve whenever needed.
