Components Typically Covered in a DNA Replication Worksheet A worksheet on DNA replication often includes:

1. Diagrams of the replication fork
2. Labeling exercises for enzymes such as DNA helicase, DNA polymerase, primase, and ligase
3. Questions about the directionality of DNA synthesis (5’ to 3’)
4. Steps involved in unwinding, primer synthesis, elongation, and sealing of DNA fragments
5. Comparison between leading and lagging strands

Sample Questions Some common questions include:

1. Describe the role of DNA helicase during replication.
2. Explain why DNA replication is considered semi-conservative.
3. Draw and label the replication fork, indicating where replication proteins act.
4. What is the function of DNA ligase?

Transcription: The Process of Making RNA from DNA
